PLANNING SHEET

MODULAR WALL SYSTEM PLANNING PACKET

Refer to enclosed instruction sheet to familiarize yourself with the system. All 13 wall sections are reproduced full size on this sheet. Make multiple copies on a photocopy machine, cut out wall sections, and glue onto cardstock. When cutting out wall sections, leave a "glue tab" above each piece that will be glued to an upper story or cornice. Glue pilasters between walls. Cut paper wall sections apart where one bay width is desired. (Actual panels separate easily.) An entire structure can be built in this manner...you will know in advance exactly how it will look on your layout and which parts you will need to purchase.
